3.02 Base Proposal

Proposers shall submit a Pricing Formula based on either of the Pricing Options outlined herein.

- 3.02.1 **PRICING OPTION #1 - MARKET PRICING FORMULA.** The Township is aware that recycling markets are highly volatile and that pricing will need to be adjusted over the life of the contract. Accordingly, the following formula has been developed to fairly allocate the risks associated with changing recyclable material markets and possible contamination.

ALL PROPOSERS WILL BE BOUND BY THE TERMS OF THIS FORMULA EQUALLY.

MARKET PRICING FORMULA:

The Market Pricing Formula shall consist of component parts. This Formula shall be used in the evaluation process:

Gross Market Price

Proposers shall submit a Gross Market Price (Whether positive or negative) that is in effect at the time of the proposal submission. This price is expected to change during the course of the contract in direct proportion to the Market Index utilized for each commodity.

Fixed Fee Processing Cost:

The cost of processing the recyclable materials delivered to the Market.

Net Market Price:

The net value of those recyclable materials delivered to the Market after adjusting the Gross Market Price with the Fixed Fee Processing Cost.

Percentage Allocation:

The percentage of the Net Market Price shared by the Proposer and the Township of South Brunswick.

Final Market Share:

The result of applying the percentage for market sharing submitted by the Proposer.

Market Formula:

Gross Market Price – Fixed Fee Processing Cost = Net Market Price

EXAMPLE #1:

Gross Market Price	- Fixed Fee Processing Cost	= Net Market Price
\$50/ton	- \$75/ton	= \$-25/ton

Percentage Allocation: 50% Township/50% Proposer

Final Market Share:

Percentage Allocation	x Net Market Price	= Final Market Share
0.5	x \$-25/ton	=\$-12.50/ton to South Brunswick

Contamination and Moisture Surcharges:

The Township understands that recyclables are commodities that must meet minimum quality standards. The Township will work with the successful Proposer to ensure that recyclable material delivered to the recycling facility meets the necessary standards as outlined herein.

Accordingly, the Township has asked that proposers responding to this RFP submit a Contamination Surcharge amount to better allocate the risk associated with contaminated recyclable materials. However, all proposers are advised that no Township can change behavior instantly. Accordingly, the following procedure will govern the application of the Contamination Surcharge as outlined within this RFP.

Prior to the assessment of any Contamination Surcharge, the Contractor shall comply with the following procedures:

1. The Contractor shall notify the Township within twenty-four (24) hours of contamination being received in writing via electronic mail. The notification shall include:
 - A. The date and time that the load was delivered.
 - B. The truck number that delivered the load.
 - C. A written description of the contamination with an estimated percentage of contamination.
 - i. A description of the methodology used to determine the percentage of contamination present.
 - D. A photographic record consisting of a minimum of five (5) photographs of the load identifying the contamination. Photographs shall include:
 - i. A photograph of the truck delivering the load with an overview of the entire load.
 - ii. Closeups of contamination in context with surrounding materials.

2. The Township shall be provided with a period of thirty (30) weekdays to correct the contamination issue from the date of notification. This equates to four (4) collection cycles for a particular collection zone.
 - A. Within this period, the Town may inspect each load being delivered to verify compliance as the load is delivered.

3. If, after the thirty (30) day period, the next load delivered to the Contractor exceeds the contamination outlined herein, the Contractor may assess the Contamination Surcharge on each ton of Contamination delivered based on the following formula retroactively to the first load delivered to the Contractor.

Contamination Surcharge Calculation:

Tare Weight of Vehicle First Load = X tons

Documented Contamination Level in percent = Y

Assessed Contamination Surcharge = Contamination Surcharge Amount x (X) x (Y) x 50%.

Sample Calculation:

Contamination Surcharge = \$75/ton.

Tare Weight (X) = 6 tons

Documented Contamination Level (Y) = 12%

Assessed Contamination Surcharge = \$75 x 6 tons x .12 x 50% = \$27.00

If Contamination in four (4) additional loads remains constant, then Contamination Surcharge assessed will equal: $\$27 + \$27 + \$27 + \$27 + \$27 = \135.00

4. Should any loads be delivered after the limits outlined above that exceed the contamination levels outlined herein then the Contractor may assess 100% of the contamination surcharge calculated with the above referenced notification procedure and formula.

Moisture Content of Fiber.

Industry standards allow for up to 12% moisture. New Jersey has an average of 117 days of rain each year where precipitation exceeds .01 inches or greater. The Township understands that moisture content is an issue. The Township is willing to consider some level of shared risk for excess moisture on fiber.

The Proposer shall submit a risk sharing formula for excess moisture (Percentage of risk assigned to each party). The risk sharing formula shall be implemented in accordance with the following procedures.

Procedure for Allocating Moisture Risk:

- The Contractor shall notify the Township within twenty - four (24) hours of a load of paper for which a moisture claim is being made in writing via electronic mail. The notification shall include:
 - The date and time that the load was delivered.
 - The truck number that delivered the load.
 - A copy of the weather report for the date in question.
 - A photograph of the moisture readings made with a calibrated moisture meter (EmcoAP500Moisture Meter or Equivalent).
 - No fewer than three (3) moisture readings shall be submitted with readings from the middle of the pile, the middle of the front of the pile and the middle of the back of the pile.
 - All readings shall be reported and the average of the three readings shall also be reported.
 - Surface readings will not be accepted.
 - A photographic record consisting of a minimum of five (5) photographs of the load documenting the moisture shall be provided. Photographs shall include:
 - A photograph of the truck delivering the load with an overview of the entire load.
 - Closeups of fiber.

Moisture Surcharge based on the following formula on each load delivered to the Contractor.

Moisture Surcharge Calculation:
Tare Weight of Vehicle First Load = X tons
Moisture Surcharge in dollars = Y
Assessed Moisture Surcharge = (X) x (Y).

Sample Calculation:
Presumes moisture readings in excess of 12%
Tare Weight (X) = 6 tons
Moisture Surcharge = \$75/ton.
Assessed Moisture Surcharge = 6 tons x \$75 = \$450.00

3.02.2 PRICING OPTION #2 – BLENDED VALUE PRICING FORMULA

To simplify analysis requirement needs of the Township, Proposers may submit an alternate pricing option for Blended Value Pricing (BVP). The BVP formula shall consist of the following component parts:

- Market Value of Commodity at time of submission
- Commodity Composition by percentage found in Single Stream Recycling
- Blended Value of Commodity
- Presumed Contamination level in percent
- Percentage Final Market Price Allocation between South Brunswick and Proposer.

Example:

3.08.2 Monthly reporting shall conform to the same format as the annual report.

4. Failure to pay the Township of South Brunswick in accordance with the payment terms outlined within this Request for Proposals.
5. Any breach of any provision of the agreement.

3.11 Assignment of Contract

3.11.01 All parties understand that if, during the life of the contract, the contractor disposes of his/her business concern by acquisition, merger, sale and or/transfer or by any means convey his/her interest(s) to another party, all obligations are transferred to that new party. In this event, the new owner(s) will be required to submit all documentation/legal instruments that were required in the original Proposal/contract.

3.12.01 Before commencing the Work, the Contractor who is awarded a contract for the marketing of Fiber and/or Commingled Materials shall furnish to South Brunswick the following:

It must be a Performance and Payment Bond, in the form acceptable to the Township of South Brunswick, and in the amount equal to the sum of the following formula and shall be equal to the annual cost/value of the Contract.

The annual value of the Performance Bond shall be calculated as follows:

Total tonnage of all fiber and/or commingled materials, as outlined within this RFP multiplied (X) by the proposed Average price per ton in dollars for those recyclable materials on which a price is offered under the terms of this Proposal.

Example:
 South Brunswick Average Recycling Tonnage for Fiber and Commingled Materials is **4469 tons** per year.
 Proposer offers an average price (either as paid or being paid) of \$35/ton for Fiber and Commingled Materials per year

Total Performance Bond shall be equal to:
\$35/ton X 4469 tons = \$156,415 Performance Bond Amount
